London Money Market.

London, Oct. 13.—The abundance of money has not lessened and borrowers are able to obtain funds at practically their own terms. Discounts are firm. The announcement of a further shipment of half a million in gold today from India was counteracted by American inquiries. Business transactions were small, operators being charry of taking bills at any of the market.

The Statist says:

"An early advance in the bank rate seems unavoidable. The supply of money is still superabundant. This abundance is regrettable, for, with the American exchange falling to the gold point, the Bank of England has already been obliged to sell £200,000 in the United States, and more is expected to go. The question is, how high must money be raised in London to stop the threatened outflow of gold to the United States and Germany and maintain the Bank of England's reserve, now £21,000,000, on a safe level?"

The theme of all commentators is the probable loss of more gold New York.
